

DECO VISION

Homedecor discovery platform powered by visual AI

See your space in a new light, AI-powered home decor discovery!

Decovision is a home decor discovery platform powered by visual AI. It aims to address the challenges faced by customers when purchasing home furnishings online, such as uncertainty about fit, color coordination, and making confident purchase decisions.

The platform offers a visual AI solution to narrow down options and recommend relevant products that align with a customer's space, preferences, and existing items.

Key features

- Automatic categorization of items within a brand's catalogue.
- "View in Room" option for virtual placement of furniture and decor items.
- Data analytics reports for brands to understand their customers' needs.
- Best matching solutions using visual AI and neural networks.
- Designer assistant for finding the best items.

Thank You!
